

L20 DRAM Roofline — major operators

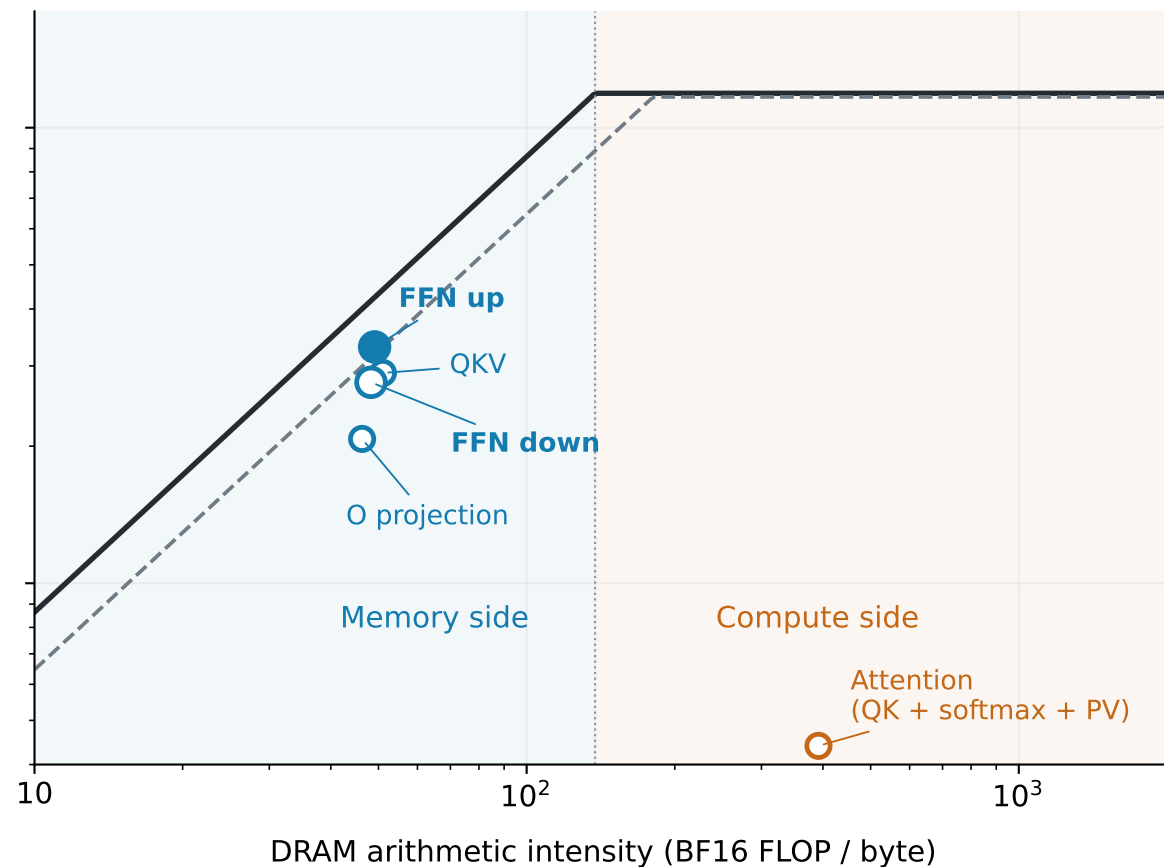

$\pi 0.5$ / SGLang 5200508 | batch 1 | 3 valid cameras | prefix 918 | 10 denoising steps

Nominal: 119 TFLOP/s BF16, 864 GB/s DRAM | ridge = 137.7 FLOP/byte

VLM

Action Expert

Filled: utilization supports the bottleneck. Hollow: roofline side only; saturation is not established.

Native fused kernels; eager NCU dispatch. Attention includes QK / softmax / PV. FFN up includes gate / activation.

Collection: 2026-09-14T16:47:37+08:00 — 2026-09-14T17:07:32+08:00 | NCU kernel times are not end-to-end latency.

0914/16 | plotted 2026-09-14T17:21:03+08:00
