

π 0.5 Action Expert — 1,654 measured kernel invocations

NCU replay duration (μ s)

NCU replay duration (μ s)

Each point is one invocation; callouts identify operator clusters. Unplotted IDs (no valid FLOP/byte point): 13, 14, 15, 16.
 Experimental PR 4419; safe/optimized relative RMSE 103.7%. Kernel replay, flushed caches; L2 empirical references; historical frequency unobserved.
